PROFILE

I'm an aspiring frontend developer focused on building modern, user-focused web applications with React. I enjoy turning ideas into clean, responsive interfaces and continuously improving my skills through real projects.

I'm actively looking for opportunities to apply my skills, learn from real-world projects, and grow as a developer. Available to join immediately!

Technical SKILLS

- Languages: JavaScript, HTML5, CSS3

- Frontend Frameworks & Libraries: React, Tailwind CSS

- Backend & APIs: RESTful APIs, JSON Server

- Tools & Platforms: Git, GitHub, Command Line

SOFT SKILLS

- Passion for mobile development, web development and clean UI

- Quick learner with attention to user experience

- Collaborative and proactive in team environments

PROJECTS

React Task Management App

- Built a task management application in React with features for creating, editing, deleting, completing, and filtering tasks.

- Implemented state management using React Hooks (useState, useEffect) and persisted user data with browser localStorage.
- Refactored the UI into reusable components to improve maintainability and follow scalable front-end architecture practices.
- Styled the application with Tailwind CSS and added UX improvements such as validation, empty states, conditional actions, and keyboard shortcuts.
- **GitHub Repo :** *https://github.com/lakhenaina/React-Task-Management-App.git*

Personal Finance Tracker

- Developed a personal finance dashboard in React featuring transaction management, real-time balance calculations, multi-criteria filtering, and search functionality.
- Implemented state management using React Hooks (useState, useEffect) and persisted financial data using browser localStorage with error handling.
- Built reusable component architecture with utility functions for currency (Nepali Rupees) and date formatting to improve code maintainability.
- Designed responsive UI with Tailwind CSS including summary cards, form validation, empty states, and user-focused UX improvements.
- **GitHub Repo** : *https://github.com/lakhenaina/PersonalFinanceTracker.git*

Cake Bliss – Online Cake Ordering Website

- Developed "Cake Bliss", an online cake ordering eCommerce platform with responsive design for mobile and desktop.
- Implemented product browsing, user authentication, and a dynamic shopping cart with secure checkout.
- Built backend APIs using Node.js and managed data with MongoDB for efficient product and user handling.
- Created an admin panel for managing cakes (add, update, delete) and improving overall system control.
- **GitHub Repo :** *https://github.com/lakhenaina/CompleteProjectWithAlgo_CakeBliss.git*

Academic Details

Samriddhi College **Expected Graduation:2027**

Bachelor's Degree

- Bachelor of Computer Applications (BCA)

Khwopa Higher Secondary School **2022**

High School Diploma

- +2 Management
