PROFILE

Frontend Developer specializing in mobile-first and cross-platform web applications using Ionic and React. Strong foundation in responsive UI design, RESTful API integration, and scalable app architecture. Quick learner passionate about intuitive user interfaces and mobile performance. Available to Join Immediately

Technical SKILLS

- **Languages:** JavaScript, HTML5, CSS3
- **Frontend Frameworks & Libraries:** React, Tailwind CSS
- **Backend & APIs:** RESTful APIs, JSON Server
- **Tools & Platforms:** Git, GitHub, Command Line

SOFT SKILLS

- Passion for mobile development, web development and clean UI
- Quick learner with attention to user experience
- Collaborative and proactive in team environments

PROJECTS

React Task Management App

- Built a task management application in React with features for creating, editing, deleting, completing, and filtering tasks.
- Implemented state management using React Hooks (useState, useEffect) and persisted user data with browser localStorage.

- Refactored the UI into reusable components to improve maintainability and follow scalable front-end architecture practices.
- Styled the application with Tailwind CSS and added UX improvements such as validation, empty states, conditional actions, and keyboard shortcuts.
- **GitHub Repo :** *https://github.com/lakhenaina/React-Task-Management-App.git*

Personal Finance Tracker

- Developed a personal finance dashboard in React featuring transaction management, real-time balance calculations, multi-criteria filtering, and search functionality.
- Implemented state management using React Hooks (useState, useEffect) and persisted financial data using browser localStorage with error handling.
- Built reusable component architecture with utility functions for currency (Nepali Rupees) and date formatting to improve code maintainability.
- Designed responsive UI with Tailwind CSS including summary cards, form validation, empty states, and user-focused UX improvements.
- **GitHub Repo** : *https://github.com/lakhenaina/PersonalFinanceTracker.git*

Cake Bliss – Online Cake Ordering Website

- Developed "Cake Bliss", an online cake ordering eCommerce platform with responsive design for mobile and desktop.
- Implemented product browsing, user authentication, and a dynamic shopping cart with secure checkout.
- Built backend APIs using Node.js and managed data with MongoDB for efficient product and user handling.
- Created an admin panel for managing cakes (add, update, delete) and improving overall system control.
- **GitHub Repo :** *https://github.com/lakhenaina/CompleteProjectWithAlgo_CakeBliss.git*

Academic Details

Samriddhi College **Expected Graduation:2027**

Bachelor's Degree

- Bachelor of Computer Applications (BCA)

Khwopa Higher Secondary School **2022**

High School Diploma

- +2 Management
